1. Purpose

This document contains the tests I did on the Domino's Pizza website. I did tests to check the purpose of the site; I checked the functions on the site, I checked if they do what they are supposed to do.

An example of some tests I did on the site:

Registering for the website, placing an order, uniform text, visibility of the website, etc...

2. Application overview

Domino's Pizza is a website that can be used both on mobile and on the website.

Domino's Pizza is a company where you can order pizza.

There is a menu on the website that you can order from.

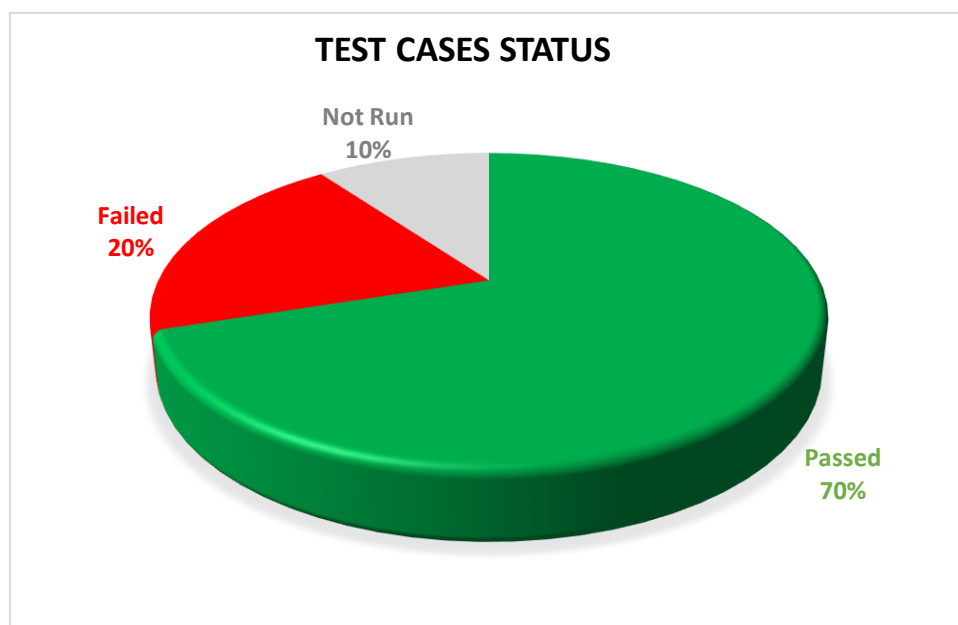

There are two options on the Domino's Pizza website:

1. Self-pickup option.
2. Delivery option.

3. Metrics

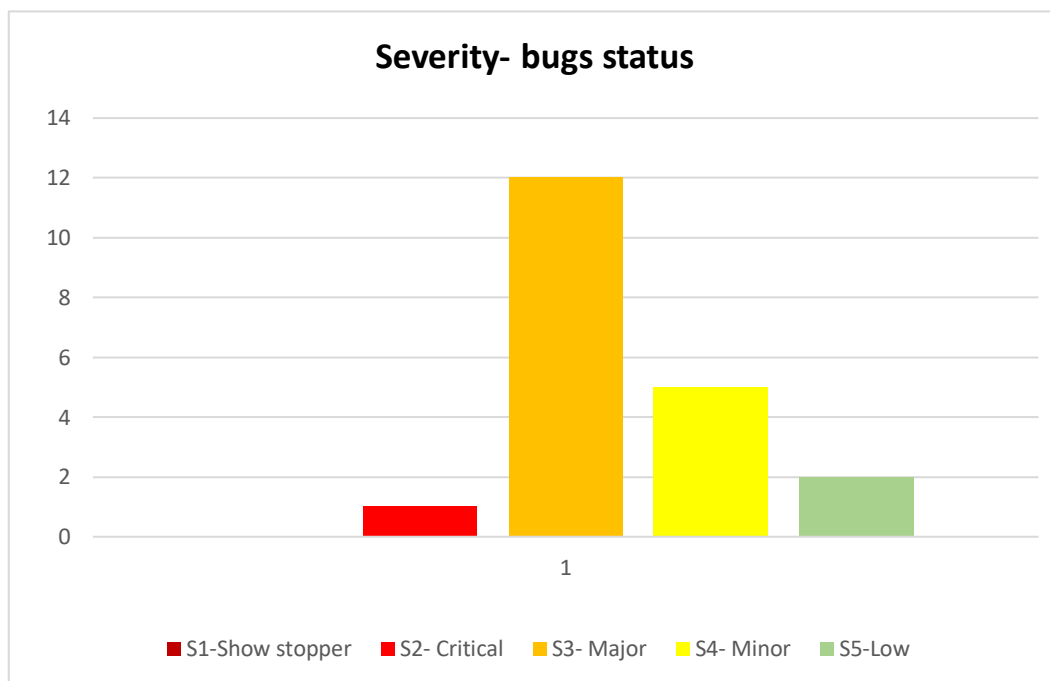

Test cases - status

Passed	Failed	Not Run	Total
70	20	10	100

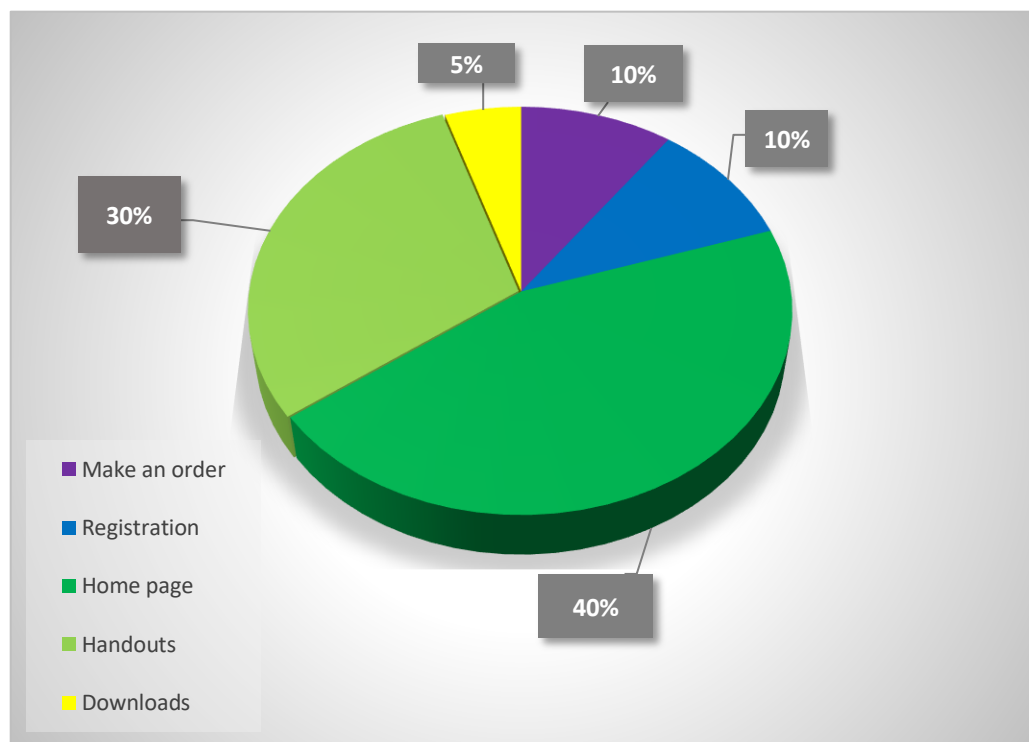

Bugs - Status & Severity

S1- Show stopper	S2- Critical	S3- Major	S4- Minor	S5- Low	Total
0	1	12	5	2	20

Defect Distribution- Module Wise

	Make an order	Registration	Home page	Handouts	Downloads	Total
S1 - Show Stopper	0	0	0	0	0	0
S2 - Critical	0	0	0	0	1	1
S3- Major	1	2	5	3	0	11
S4-Minor	1	0	4	1	0	6
S5- Low	0	0	0	0	0	2
Total	2	2	9	6	1	20

4. **Recommendation**

- Improve the time the site loads.
- To fix the bug that clicking on Instagram does not open the Domino's Pizza page.
- The button to download the application needs to be fixed; clicking on the button should lead to a link to download the application.
- The buttons in the menu on the home page should always respond, for example: the "needed" button.
- The last recommendation is that the text should always be clear so that people can read and understand what is written.

5. **Exit criteria**

- a) All test cases should be executed – **Yes.**
- b) No functional bugs with high severity; **0** Showstopper, **0** Critical, **0** Major- **Yes.**
- c) All bugs that are open are of low severity- **Yes.**
- d) No serious bugs have been opened in the last 30 days -**Yes.**

6. Conclusion

Following the tests I did on the Domino's Pizza website, I found many bugs on the website.

I found bugs that are critical to the user's experience on the site, and I also found bugs that are minor and don't affect the user's experience on the site.

Therefore, despite the critical bugs I found, the site performs its important functions, for example: you can place orders on the site, you can register on the site, you can look at the menu.

As a result, I recommend the release of the site.
